

£30,000 Reasons to buy a New Hartford home...

Save yourself time and money when you choose to buy new. It takes on average £30,000.00 to bring an old home to the standard of a new build – therefore saving on huge DIY costs, not to mention dealing with contractors and managing the refurbishment.

Buying a new home means that everything is brand new and to your taste. Older homes can hide potential problems that sometimes even a survey won't uncover. This can leave you with unexpected repair costs that can mount into thousands of pounds. A Hartford Home comes with a 10 year NHBC warranty, giving you peace of mind when making your choice.

Make a smarter investment with hassle free buying, second to none after sales service and a maintenance free home.

Buy New With confidence

Reasons to buy new

Buy New!

When you purchase a second-hand home, you may find someone else's problems and decorating tastes.

On average, new homes are now 40% more energy efficient than homes built at the beginning of the decade.

Hartfords offer a second to none after sales care service. Whether it's the induction to help you to learn all about the operation and maintenance of your new home, the handy man service to help you with your move or the 24/7 support to help you and quick reaction to any issues you may have.

More energy efficient
= £556 saving/year

Buy Hartford!

Hartford homes are designed for contemporary lifestyles. Space efficient, energy saving and created to help the needs of the modern day lifestyle.
